

Deepak Gupta

Senior Full-Stack Engineer | Senior Software Engineer

New Delhi, India | +91 97165 85000 | dkgupta5000@gmail.com | LinkedIn: codewithdeep

PROFESSIONAL SUMMARY

Senior Full-Stack Engineer with 7+ years of experience building scalable, secure, high-performance web applications and end-to-end product features across frontend, backend, APIs, cloud, DevOps, and AI-enabled development. Strong expertise in React.js, Next.js, TypeScript, Node.js, Express.js, NestJS, REST APIs, GraphQL, Redux Toolkit, React Query, AWS, Docker, Kubernetes, GitLab CI/CD, and modern application architecture. Experienced in Micro Frontend Architecture, performance optimization, automated testing, accessibility, secure application development, production releases, monitoring, and troubleshooting. Hands-on experience with Generative AI, OpenAI, and AWS Bedrock. Strong in end-to-end ownership from requirements and architecture through implementation, API integration, testing, deployment, monitoring, debugging, and continuous improvement.

CORE SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Material UI, Tailwind CSS, SCSS, styled-components

Backend & APIs: Node.js, Express.js, NestJS, REST APIs, GraphQL, WebSockets, Socket.IO, API Development, Backend Development

State & Data: Redux Toolkit, Redux, React Query, Context API, Apollo Client, GraphQL Code Generator, Axios

Architecture: Component Architecture, Reusable Component Libraries, Micro Frontend Architecture, Microservices Architecture, SSR, SSG, ISR, PWA

Cloud & DevOps: AWS, Docker, Kubernetes, Git, GitLab, GitLab CI/CD, Azure DevOps, CI/CD Pipelines, Release Management

Testing & Quality: Jest, React Testing Library, Vitest, Playwright, Cypress, MSW, Unit Testing, Component Testing, E2E Testing

Performance & Security: Core Web Vitals, Code Splitting, Lazy Loading, Rendering Optimization, Bundle Optimization, SEO, WCAG/ARIA, XSS/CSRF Protection, Authentication, Authorization

AI & Observability: Generative AI, OpenAI, AWS Bedrock, AI-powered Applications, Streaming Responses, Structured Output, Model Validation, Telemetry, New Relic

PROFESSIONAL EXPERIENCE

TechBlocks

Jun 2026 – Jul 2026

Senior Software Engineer | Hyderabad, India

- Completed organizational onboarding and engineering enablement for enterprise software development, covering development standards, engineering workflows, source control, CI/CD, testing, and delivery practices.
- Participated in pre-project engineering activities covering application architecture, environment management, code quality, testing practices, release processes, and project readiness.
- Collaborated with engineering teams on development workflows, CI/CD processes, code reviews, environment readiness, and release-readiness activities.

Nagarro

Apr 2022 – Mar 2026

Senior Software Engineer | Jul 2024 – Mar 2026

- Led full-stack feature delivery using React.js, Next.js, TypeScript, Redux Toolkit, React Query, Node.js, Express.js, and API-driven application architecture.
- Developed and integrated REST and GraphQL APIs using Node.js/Express.js and Apollo tooling, supporting authentication, data handling, frontend-backend integration, and cross-system troubleshooting.
- Owned GitLab delivery workflows from feature branching, merge requests, and peer reviews through CI/CD pipelines, build/test validation, environment deployments, staged releases, production validation, monitoring, and troubleshooting.
- Improved application performance by approximately 30–35% through code splitting, lazy loading, SSR/SSG/ISR, rendering optimization, memoization, bundle optimization, and efficient state management.
- Designed and implemented Micro Frontend Architecture to enable parallel team development, reduce inter-team dependencies, and improve independent feature delivery.
- Built reusable component libraries and shared utilities that reduced development rework by approximately 20–25% and improved consistency across application modules.
- Built secure, accessible, production-ready applications and implemented automated unit, component, and end-to-end testing using Jest, React Testing Library, Vitest, Playwright, Cypress, and MSW.
- Contributed to AI-powered capabilities, AWS solutions, authentication, cross-system debugging, production support, and continuous engineering improvements.

Engineer | Apr 2022 – Jul 2024

- Developed scalable web application features using React.js, Next.js, JavaScript, TypeScript, Redux Toolkit, and React Query with reusable and maintainable application patterns.
- Developed and integrated REST APIs and backend services using Node.js and Express.js, supporting frontend workflows, API integration, validation, and end-to-end feature delivery.
- Worked with GraphQL and API-driven architecture, integrating backend data with frontend state and data-fetching workflows.
- Participated in code reviews, debugging, refactoring, automated testing, Git workflows, CI/CD processes, and Agile/Scrum delivery.

- Developed scalable web applications using React.js, Redux, Next.js, and JavaScript with reusable components and maintainable application architecture.
- Integrated RESTful APIs and backend services into React.js and Next.js applications, implementing data-fetching, error-handling, loading, and state-management patterns.
- Contributed to full-stack feature development using Node.js and Express.js, supporting backend API development, frontend integration, and end-to-end delivery.
- Improved application performance through rendering optimization, efficient state updates, code splitting, lazy loading, and frontend optimization techniques.
- Implemented automated testing using Jest and React Testing Library and participated in code reviews, debugging, refactoring, and Git-based development workflows.

EDUCATION

Dr. A.P.J. Abdul Kalam Technical University (AKTU) — B.Tech, Electronics & Communication Engineering | 2015 – 2019

Target Roles: Senior Full-Stack Engineer | Senior Software Engineer | Full Stack Engineer | Senior Frontend Engineer | Technical Lead – Full Stack
