DEEPAK GUPTA

Senior Full-Stack Engineer

React.js • Next.js • TypeScript • Node.js • NestJS • GraphQL

+91 97165 85000 | dkgupta5000@gmail.com | LinkedIn: codewithdeep | New Delhi, India

PROFESSIONAL SUMMARY

Senior Full-Stack Engineer with 7+ years of experience building scalable, secure, and production-ready web applications across frontend and backend layers. Strong hands-on expertise in React.js, Next.js, TypeScript, JavaScript, Node.js, Express.js, NestJS, REST APIs, GraphQL, Redux Toolkit, React Query, and SQL/NoSQL databases. Experienced in Micro Frontend architecture and Module Federation, reusable frontend architecture, backend APIs and services, database design and integration, authentication and authorization, automated testing, CI/CD, Docker, Kubernetes, AWS, observability, performance optimization, and secure application development. Proven ability to own features across architecture, implementation, testing, deployment, production support, and Agile collaboration.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript ES6+, React Hooks, React Router, HTML5, CSS3, MUI, Tailwind CSS, SCSS, styled-components, Vite, Webpack, Responsive Design

Backend: Node.js, Express.js, NestJS, REST APIs, GraphQL, API Design, API Versioning, Controllers, Services, Middleware, Request Validation, Error Handling, Rate Limiting, Logging, Caching

State Management: Redux Toolkit, Redux, React Query, Context API

API & Real-Time: REST, GraphQL, Apollo Client, GraphQL Code Generator, Axios, WebSocket, Socket.IO

Database & Data: MongoDB, PostgreSQL, MySQL, SQL, NoSQL, Database Design, Data Modeling, Database Integration, CRUD, Query Optimization

Architecture: Full-Stack Architecture, Microservices Architecture, Micro Frontend Architecture, Module Federation, Modular Architecture, Component Architecture, Reusable Component Libraries, Design Systems, API-Driven Architecture, SSR, SSG, ISR, PWA, Monorepo

Cloud & DevOps: AWS, Docker, Kubernetes, GitLab CI/CD, GitHub, Azure DevOps, CI/CD Pipelines, Build Automation, Deployment, Environment Management

Testing & Quality: Jest, React Testing Library, Vitest, Playwright, Cypress, MSW, Unit, Integration, E2E and Regression Testing

Security: Authentication, Authorization, JWT, OAuth2, OIDC, RBAC, Input Validation, XSS/CSRF Protection, Secure API Integration, Session Management, Auth0, OWASP

Performance & Accessibility: Core Web Vitals, Code Splitting, Lazy Loading, Memoization, Rendering Optimization, Bundle Optimization, Caching, SEO, WCAG, ARIA, Semantic HTML, Cross-Browser Compatibility

AI & Observability: Generative AI, OpenAI, AWS Bedrock, AI-assisted Development, AI-powered UI, Streaming, Structured Output, Model Validation, Graceful Fallbacks, Telemetry, New Relic

Engineering: Git, GitHub, GitLab, Code Reviews, Agile/Scrum, SDLC, Technical Debt, SOLID, Design Patterns, DSA

PROFESSIONAL EXPERIENCE

TechBlocks | Senior Software Engineer Hyderabad, India | Jun 2026 – Jul 2026

• Completed organizational onboarding and engineering enablement activities for enterprise software development.

• Collaborated with engineering teams during the pre-project phase to understand development standards, engineering workflows, source control, CI/CD, code quality, testing, and delivery processes.

• Worked with engineering teams to understand application architecture, environment management, testing practices, security expectations, and release-readiness activities.

• Participated in technical discussions around frontend and full-stack engineering practices, including reusable component architecture, API integration, testing strategies, code quality, and maintainable application development.

• Reviewed engineering processes and development standards across source control, CI/CD, automated testing, environment management, and release workflows to support production-ready software delivery.

Nagarro | Senior Software Engineer Jaipur, India | Apr 2022 – Mar 2026

• Led frontend architecture and end-to-end feature delivery for enterprise-scale applications using React.js, Next.js, TypeScript, Redux Toolkit, and React Query.

• Developed backend functionality and API services using Node.js and NestJS, applying controller/service patterns, modular server-side logic, request validation, error handling, and reliable client-server integration.

• Designed and integrated GraphQL and REST APIs using Apollo tooling and GraphQL Code Generator, including API design, API versioning, data contracts, and clear API-data boundaries.

• Worked across full-stack workflows involving authentication/authorization, JWT, OAuth2/OIDC-based security patterns, input validation, RBAC, defensive error handling, and production troubleshooting.

• Designed and implemented Micro Frontend architecture using Module Federation, enabling independently developed and deployable frontend modules across multiple teams.

• Established reusable component libraries, shared utilities, modular architecture, and shared frontend capabilities that reduced development rework by 20–25%.

• Worked on backend data workflows involving SQL/NoSQL databases, database integration, data modeling, CRUD operations, and query optimization.

• Improved application performance by 30–35% through code splitting, lazy loading, SSR/SSG/ISR, rendering optimization, memoization, bundle optimization, caching, efficient state management, and Core Web Vitals improvements.

• Built secure, accessible, production-ready applications aligned with WCAG/ARIA practices and secure engineering principles.

• Implemented automated unit, component, integration, and end-to-end testing using Jest, React Testing Library, Vitest, Playwright, Cypress, and MSW.

• Owned the application lifecycle using GitLab, including merge requests, peer reviews, CI/CD, build/test validation, environment deployments, staged releases, production validation, monitoring, troubleshooting, and issue resolution.

• Worked with AWS, Docker, and Kubernetes as part of application deployment and production engineering workflows.

• Implemented structured API error handling, logging, telemetry, monitoring, and production diagnostics to improve resilience and observability.

• Collaborated with QA, Product, Design, Architecture, DevOps, and Engineering teams in Agile delivery, contributing to technical debt reduction, refactoring, reusable solutions, and knowledge sharing.

Web Corporation | Software Developer Delhi, India | May 2019 – Mar 2022

• Developed scalable web applications using React.js, Next.js, JavaScript, TypeScript, Node.js, and Express.js, contributing to both frontend and backend feature development.

• Built reusable React components and application modules while implementing responsive, accessible, maintainable, and production-ready interfaces.

• Developed modular REST API functionality with Node.js and Express.js, including request validation, API versioning, API error handling, reusable middleware patterns, rate limiting, logging, and frontend integration.

• Implemented end-to-end full-stack features by connecting React/Next.js applications with Node.js/Express.js backend services and database-driven workflows.

• Worked with MongoDB/MySQL for database integration, data modeling, CRUD workflows, and query optimization.

• Implemented authentication and authorization using secure session and token-based patterns, with input validation and defensive API handling.

• Improved application performance through rendering optimization, efficient state updates, code splitting, lazy loading, caching, and reusable application architecture.

• Implemented automated testing using Jest and React Testing Library and participated in code reviews, debugging, refactoring, Git workflows, release support, and production issue resolution.

• Collaborated with designers, backend engineers, QA, and business stakeholders throughout the software development lifecycle and Agile delivery.

EDUCATION

Dr. A.P.J. Abdul Kalam Technical University (AKTU) — Bachelor of Technology (B.Tech), Electronics & Communication Engineering | 2015 – 2019
